**2.3.3.1 STUDENT MENTORING SYSTEM**

Mentor – mentee activity is an essential part of college's curriculum since last few years. In the beginning of the academic year, every student is assigned a mentor from their respective class faculty. The allocation is as per the student: teacher ratio. The mentor faculty interacts formally with the students and asks about their difficulties on an academic and personal level. Mentors are supposed to interact with students twice in an academic year. In the first interaction, the mentor gets to know the student's academic general profile and career goals, evaluates their state of mind along with their potential to perform academically. Furthermore, the students are divided in to groups based on their goals and level of understanding by mentor to work on their desired outcome. A series of formal and informal questions were asked to the students to analyze their strengths and weaknesses. Moreover, the mentor guides the assigned students to leverage their strengths against their weaknesses. Further, the mentor tries to identify few of the inherent qualities or talent of students in order to grab opportunities in accordance with their career goals. Mentee's questionnaire contains: Basic Information, Academic Performance, Achievement/Award, Medical/health issue, Strengths and Weaknesses analysis Interaction with the mentee.
